

## ORGANISATIONAL IMPROVEMENT

### Maturity Assessment

Every organisational improvement should start by evaluating the strength and weaknesses of the status quo.

Our maturity assessment modules (for projects, programmes and portfolios) provide a fast, simple and reliable tool to undertake such an evaluation by obtaining the right information and understanding the organisational capacity in

managing its own initiatives as compared to industry benchmarks.

We cover all related organisational aspects; strategic, technical, methodological and behavioural.

As an outcome, you will have a detailed analysis of your organization requirement versus its capacity, allowing the development and implementation of an organizational improvement plan adapted to your very needs.

#### The full maturity assessment encompasses

- 6 analysis criteria and an organizational screening area.
- 5 applicable maturity levels.
- External benchmarks references.

#### Benefits

- Clarity over the current situation and evolution guidelines.
- Focusing of growth efforts on areas of higher priority.
- Benchmarking with similar actors in the industry.
