

Projectize has published a White Paper of its research titled "Optimising R&D Performance in the Italian Automotive Components Industry".

The White Paper provides a statistical overview and recent trends in the sector and identifies some of the key challenges

The White Paper provides a statistical overview and recent trends in the sector and identifies some of the key challenges faced by the Italian automotive parts and components manufacturers. Namely, the complex global resource management coupled with need for flexibility to change schedule at short notice on the basis of changes to their clients' related vehicle delivery milestones.

To find out more about the implications of Projectize's R&D Automotive study on your business, please contact:
